

VENKATESH ARETI

Senior Python Developer | Cloud Developer| Technical Architect

Hyderabad, India

 venkateshareti5954@gmail.com |  +91 9493779067 / +91 8333833509

Professional Summary

Python Cloud Developer with **9+ years of experience** in application design, development, and deployment of **highly scalable, secure, and cloud-native solutions** across **Azure and AWS**. Strong expertise in **serverless architectures, microservices, RESTful APIs, and CI/CD automation**. Proven track record in **end-to-end application development, architecture design, ARB presentations, cloud migrations, and legacy system modernization**. Experienced in integrating **Azure identity, cloud security, and Generative AI services** to deliver robust, enterprise-grade applications.

Core Competencies

- Python Backend Development & Solution Architecture
 - Team Leadership & Technical Mentoring
 - Cloud-Native & Serverless Architectures
 - Microservices & REST API Design
 - Azure & AWS Cloud Platforms
 - CI/CD & DevOps Automation
 - Identity & Access Management (IAM, Azure AD, JWT)
 - Legacy Application & Data Migration
 - Architecture Diagrams (HLD/LLD) & ARB Reviews
 - AI / GenAI Integration for Enterprise Applications (Amazon Bedrock, OpenAI)
 - LLM-Based Document Processing & Semantic Search (LangChain, Pinecone)
-

Technical Skills

Languages & Frameworks: Python, Django, Flask, FastAPI, Sanic, AWS Chalice

Cloud Platforms: Microsoft Azure, Amazon Web Services (AWS),

Azure: Azure Functions, API Management (APIM), Azure SQL, Blob Storage, Azure Key Vault, Azure AD (App Registrations), Managed Identity, Microsoft Graph APIs

AWS: Lambda, API Gateway, S3, RDS (Aurora Serverless), DynamoDB, Redshift, CloudWatch, Secrets Manager, EC2, VPC

Databases: PostgreSQL, MySQL, Amazon Redshift, DynamoDB

DevOps & Tools: GitLab CI/CD, Jenkins, Docker, Git, Bitbucket, Jira

Messaging & Async: RabbitMQ, Celery

AI / GenAI: OpenAI, Amazon Bedrock, Langchain Framework, pinecone/chroma/FAISS vector databases

Professional Experience

Senior Technical Architect

MouriTech Pvt. Ltd., Hyderabad | *Dec 2019 – Present*

- Architect and deliver enterprise-grade Python backend systems using Azure and AWS, supporting multiple mission-critical applications.
 - Design microservices-based serverless architectures with strong emphasis on scalability, security, and reliability.
 - Lead architecture design discussions, prepare HLD/LLD documents, and present solutions for ARB approvals.
 - Manage and mentor a 7-member engineering team, conducting code reviews and enforcing best practices.
 - Implement secure authentication and authorization using Azure AD, Managed Identity, JWT, and IAM.
 - Drive CI/CD automation and cloud deployments using GitLab pipelines and Jenkins.
 - Integrate Generative AI capabilities using OpenAI and Amazon Bedrock.
-

Software Engineer

Tata Consultancy Services (TCS), Hyderabad | *Jan 2019 – Nov 2019*

- Developed backend services using Python and Django for enterprise applications.
 - Built and maintained RESTful APIs and handled database integrations.
 - Collaborated with cross-functional teams to deliver high-quality enterprise solutions.
-

Software Engineer

Apalya Technologies Pvt. Ltd., Hyderabad | *May 2016 – Jan 2019*

- Built backend APIs for high-traffic OTT and media streaming platforms.
 - Developed and optimized APIs supporting millions of users.
 - Coordinated with frontend and infrastructure teams for seamless production delivery.
-

Project Experience

Azure Cloud Transformation – PeopleSoft Migration

Role: Python Cloud Developer | Senior Technical Architect

- Led end-to-end migration of multiple PeopleSoft applications from on-prem to Azure.
 - Applications included Emergency Response Teams, ComplySci, FM Systems, Badge, Concur, TempID, Info Barrier, and Corporate Microservices.
 - Built independent serverless microservices using Azure Functions and centralized access using Azure API Management.
 - Implemented Managed Identity-based secure communication with Azure SQL, Blob Storage, and Key Vault.
 - Automated deployments using GitLab CI/CD and presented architectures for ARB approval.
-

AI Translation Hub

Role: Backend Team Lead | Senior Technical Architect

- Implemented Azure AI Document Translator REST API, enabling seamless multilingual communication across global teams
- Automated document workflows using Azure Function Apps with Python and Django REST, improving efficiency by 30%
- Designed microservices architecture for AI Translation Hub, enhancing scalability and reducing deployment time by 40%
- Optimized PostgreSQL database schema, improving query performance by 25% and streamlining deployments
- Monitored performance via Azure Application Insights, resolving 30+ critical issues monthly, ensuring 99.9% availability

LAZARD – CDV (AWS Migration Platform)

Role: Python AWS Developer (API)

- Designed a plug-and-play application integration platform on AWS.
 - Migrated enterprise applications from on-prem to AWS, including SAP, HR, Finance, Purchase Orders, AuditBoard, Esker, FX, and IA systems.
 - Developed secure REST APIs using AWS Chalice, JWT authentication, and serverless architecture.
 - Leveraged AWS Lambda, API Gateway, Aurora Serverless, and Secrets Manager for scalability and security.
 - Automated deployments using Jenkins and GitLab CI/CD.
-

Additional Projects (Summary)

REEF: Built AWS Lambda pipelines for CSV/XLSX ingestion into Amazon Redshift, automated with CloudWatch.

MediaKind: Developed backend APIs on GCP (App Engine, Compute Engine, Cloud SQL) with SSL security.

EQUINOX: Migrated APIs from .NET to Python Sanic, improving performance and maintainability.

BID IT Migration: Developed Django APIs and supported infrastructure migration to Ericsson E2C Services.

Vodafone Play & SUN NXT: Built and maintained APIs for large-scale OTT platforms across web, mobile, and smart TVs.

Education

B.Tech – Computer Science Engineering

BVC Institute of Technology and Science (JNTU Kakinada) – 70.16%
